GREENHOUSE GAS CO-EFFICIENT 2014

The Commission's *Guideline 13: Greenhouse Gas Disclosure on Electricity Customer's Bills* requires the co-efficient for a calendar year to be calculated and advised to retailers.

The Department of State Development, Business and Innovation has advised the co-efficient retailers are to use for the 2014 calendar year in Victoria is:

1.35 kg CO₂-e / kWh (kilograms of carbon dioxide equivalent emissions per kilowatt hour)

These figures should be applied directly to the amount of electricity consumed by the end-user.
