

Minimum feed-in tariff review 2020-21

Submission received through Engage Victoria

Date submitted: 2 January 2020

Submission written by: Anonymous

On 3 December 2019, we published our draft decision for the Minimum feed-in tariff review 2020-21. This draft decision paper asks stakeholders for their views on our proposed minimum feed-in tariff for 2020-21.

1. What do you think of the proposed minimum feed-in tariff for 2020-21?

It concerns me in a time where the market is becoming more and more reliant on home installed solar the tariffs are being reduced. The tariff should be at parity with what we are paying for the electricity. I'm sure the retailers aren't losing money on this... but homeowners (those that pay the bills at least...) will be affected. Typical behaviours of protecting the large business and hanging the general public out to dry.
