

RMFITS Pty Ltd stands for Risk Management, Financial services, Investments, Training and Systems

RMFITS Pty Ltd is a company that provides services to counterparties, consultants, customers and clients in the financial markets.

RMFITS and its partners have over 20 years experience in the financial markets including front, middle and risk management operations in the derivatives and environmental markets.

Our aim is to provide experience and education to enable counterparties and customers to successfully operate and perform in the financial markets.

RMFITS business model is based around providing support for many key functions for the front office, middle office, treasury, risk management, compliance and systems areas.

We achieve this complete end to end business consulting and advisory service by utilising our experience and partnering with companies with varying areas of expertise and experience in financial markets.

RMFITS provides counterparties, customers and consultants with education through expert knowledge, experience and tools to better manage their risks, portfolios and business. These tools include; weekly markets reports (spot and forwards), training modules and seminars, realistic simulation courses and implementation of business plans, portfolio management, hedging and trading strategies, market and risk management systems, policies and processes to enable risk management oversight and portfolio management for new entrant and existing companies.

We provide theory and practical implementation of the above strategies based on balanced management of both commercial and risk appetite expectations of a company's Board.

Some of RMFITS most recent engagements include:

- ASX Listed telecommunications company
- Privately owned environmental company
- Government owned trading company
- LSE listed energy company
- NYSE listed production company
- ASX listed treasury customer
- ASX listed Tier 1 Bank
- Asian based investor
- Oversea based government owned energy (oil, electricity) retailer and generator/production
- A Tier 2 new entrant retailer
- An established energy retailer (electricity and gas)

Peter Swampillai DIRECTOR (RMFITS Pty Ltd),

Peter Swampillai is a financial markets specialist. His work in various industries has given him experience in corporate governance, financial risk management, providing financial advice, trading and making a market across a wide range of derivative, futures and financial products. He also has a good understanding of ASIC, APRA and AFSL requirements and recommended practices.

Peter has worked in both front office and risk management roles in which he has gained over 12 years of experience. Peter's, main focus has been in governance, risk management, hedging and trading (both spot and forward) for the emerging counterparties (including oil, renewable, environmental, electricity and gas) and derivatives markets in which he has had responsibility for formulating detailed financial markets strategies and risk management oversight (including implementing risk management and credit policies, systems and business process) to enable management of price, credit and operational risk for production, retail, proprietary and merchant businesses.

Some of Peter's previous employers have included Ergon Energy, Hydro Quebec International, AGL, Pulse Energy (JV between Shell, Woodside and United Energy) and United Energy.

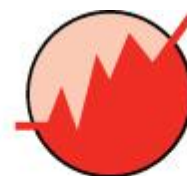

His strengths lie in understandings of end to end financial services business requirements including governance, risk management, spot, derivatives and futures markets expertise. Peter also has experience in mergers & acquisitions (including portfolio and company evaluation).

Peter is a qualified Responsible Officer (Derivatives) under the Australian Financial Services Licence regime and is an Australian Company Director of three companies. Peter is a member of the ACI Foreign Exchange Association, Global Association of Risk Management Professionals and on various external Board Sub Committees (including Risk Management Committees).

Peter is also a Founder & Director in the Trading Simulation Company which provides an interactive and simulated financial markets experience. The trading simulation courses and games are provided to a wide range of participants (from Analysts to Directors) wanting to experience the varying roles associated with spot and forward financial markets (including carbon trading) and how banks, retailers, producers, generators and proprietary traders manage risks and rewards. The Trading Simulation Company has a joint venture with the Australian Stock Exchange (ASX).

Some of the Trading Simulation Company recent participants included:

IMC Pacific Fund – Director
CBA Global Markets – Risk Manager
Westpac Global Markets – Analyst
Attunga Capital Fund - Associate
Ergon Energy – Trader
Certainty Compliance – Senior Consultant
ACI – Chief Operating Officer
