

Minimum feed-in tariff review 2020-21

Submission received through Engage Victoria

Date submitted: 10 December 2019

Submission written by: Anonymous

On 3 December 2019, we published our draft decision for the Minimum feed-in tariff review 2020-21. This draft decision paper asks stakeholders for their views on our proposed minimum feed-in tariff for 2020-21.

1. What do you think of the proposed minimum feed-in tariff for 2020-21?

We have had to fight with suppliers via switching and switching. They give you better for a month or so then drop it. There should be a SET flat rate that is not minimal. Make it a percentage of the wholesale price. Make it pay back and not over 10 years. Most people who have solar need higher feed-in rates. Dropping the price each year as the usage fee goes up is insane. They are both power but you let them charge us more and pay us less.
