Wannon Water **	134	216	238	22	10%
Westernport Water	69	99	103	4	4%

(\$, nominal)

**Notes:**

The typical annual household bill is calculated using the 2010-11 average consumption figure and includes both fixed and variable water and sewerage charges.

Tenants of rental properties are not responsible for payment of fixed charges.

Where businesses have multiple pricing zones, the typical household bill is calculated using the prices in the largest town.

Does not include Parks and Waterways & Drainage charges.

---

\* The Commission has approved a further increase of 3 per cent to Barwon Water's maximum fixed and variable water prices in 2012-13 (on top of the already approved 7 per cent), the further increase is to take effect only after Barwon Water has satisfied the Commission that the Melbourne-Geelong Pipeline is in service; the resulting typical bill will be \$1,026.

\*\* Wannon Water has indicated that it will only apply a 10% price increase in 2012-13 (1% less than the approved maximum).
