

Minimum feed-in tariff review 2021-22

Submission received through Engage Victoria

Date submitted: 20 November 2020

Submission written by: Anonymous

From 17 November 2020, we began accepting submissions on our Minimum feed-in tariff review 2021-22 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

Your comments on this draft decision:

The minimum feed-in tariff is a joke at 7.1 cents per kilowatt. Where is the incentive for householders to invest in solar or other forms of electricity generation when the pay-back period is so long?

The government should get serious about reducing emissions from fossil fueled electricity generation and that means SUBSIDISING THE FEED-IN TARIFF to make it attractive for every Victorian with a roof to invest in solar.
