

Revoking the Electricity Customer Metering and Transfer Codes of Practice

Email submissions received

Date Submitted: 8 May 2025.

Submission written by: Energy On

Dear Energy Reform,

On behalf of Energy On, I am writing to provide our response to the consultation on the proposed revocation of the Electricity Customer Transfer Code of Practice and the Electricity Customer Metering Code of Practice.

Q1. Do you have any concerns regarding the proposed revocation of the Transfer Code or the Metering Code? Please elaborate.

From Energy On's perspective as an embedded network operator, we do not have any significant concerns regarding the proposed revocation of either the Electricity Customer Transfer Code of Practice or the Electricity Customer Metering Code of Practice.

Q2. Are there any provisions in the Transfer Code or Metering Code we should consider retaining? Please elaborate.

At this stage, there are no specific provisions within either Code that we consider essential to retain. However, if any provisions are proposed to be retained, we would be happy to review and provide further feedback at that time.

Q3. Do you anticipate any potential impact to industry associated with revoking the Transfer Code or the Metering Code? Please elaborate.

We do not anticipate any significant impact to the industry as a result of the revocation. As an embedded network operator, we are complying with the following regulatory frameworks:

- The Victorian General Exemption Order 2022
- The National Electricity Rules
- The Energy Retail Code of Practice
- The Electricity Distribution Code of Practice

OFFICIAL

If you require any further clarification, please do not hesitate to contact me.

Regards,

Rosa Di Noto

Operations Manager
