

Attachment 4A – Material Regulatory Breaches

Date: 1 March 2022

This Attachment 4A sets out, to the best of our knowledge and belief, having undertaken appropriate due diligence enquiries, the material breaches of obligations regulated by the ESCV and other regulators, that the Applicant, its directors, its related bodies corporate, and other persons with significant managerial responsibility or influence on the Applicant (**relevant persons**) have been involved in over the past seven years (2014-2021).

This Attachment 4A:

- 1. is confined to a consideration of the conduct of the relevant persons of the ENGIE Group operating in Australia. This is relevant as the HBESS will be operated by the ENGIE Group in Australia;
- 2. covers:
 - a. regulatory breaches of obligations that are material having regard to their impact or potential impact on regulated energy markets, customers or the health and safety of people or the environment;
 - b. <u>alleged</u> material regulatory breaches of obligations on the basis that proceedings have been instituted by regulators but have not yet finalised; and
 - c. infringement/penalty notices have been issued and paid by the Applicant or its related bodies corporate (without any admission of liability or a contravention of a law or licence);
- does not cover matters self-reported to regulators or independently raised by regulators to the Applicant or its related bodies corporate which have led to no further action by those regulators; and
- 4. includes links to relevant publicly available information.

We would be happy to elaborate with any further details the ESCV may require.

Entity / Regulator	Material Regulatory Breach or Alleged Breach
Pelican Point Power Limited Regulator: AER	 Pelican Point Power Limited: infringement notices issued for failure to keep contemporaneous records in relation to material renominations for use of a transportation service as required under the National Gas Rules. Self-reported by Pelican Point Power Limited.
