

[Part 1: general text about the Essential Services Commission]

About

The Essential Services Commission is Victoria's independent economic regulator. We promote the long-term interests of Victorian consumers with respect to the price, quality and reliability of essential services, such as electricity, gas and water.

We regulate Victoria's energy, water and transport sectors, and administer the rate-capping system for the local government sector.

We also regulate the Victorian Energy Upgrades program, which helps Victorians reduce their energy bills and greenhouse gas emissions by providing access to discounted energy efficient product and services.
