## Group: interface

This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. The information is intended to help readers understand the impacts of rate capping, which was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges each financial year.

You can compare this council's data against its 'group' by looking at the fact sheet for interface councils. Further information is available at <http://www.esc.vic.gov.au/outcomes-reports>. You'll find an interactive version of this fact sheet, a reader's guide to help you understand key terms and information about the sector as a whole.

## Has there been a change in service quality and community satisfaction?

# Financial position

See the reader's guide for data sources and useful information. Where noted, the numbers in this fact sheet have been adjusted for inflation and are expressed in 2023–24 dollars.

## Is council operating sustainably?

Between 2020–21 and 2023–24, Cardinia Shire Council reported an average **adjusted underlying result** of **-1.4 per cent**. The average result would have been **0.8 per cent**, if the timing of the financial assistance grants payment in 2023–24 was consistent with previous years.

An ongoing negative result, or deficit, suggests that, without the receipt of one-off grants or an increase in ongoing revenue, the council may not have sufficient revenue to fund the range and level of services it has been providing.

Council could meet its current financial obligations with a reported average **working capital ratio** of **231 per cent** between 2020–21 and 2023–24.

**Indebtedness** (non-current liabilities as a percentage of own-source revenue)

Between 2020–21 and 2023–24, council reported an average **indebtedness ratio** of **21.3 per cent**. The lower the percentage, the greater a council's ability to repay debt from revenue it controls.

**Note:** The year-on-year changes in the financial indicators can be affected by the timing of financial assistance grant payments. We have estimated the impact of a change in the timing of these payments for the 2023–24 adjusted underlying result. Please see the reader's guide for more information.
