

Wangaratta Rural City Council

Group: regional city

This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. The information is intended to help readers understand the impacts of rate capping, which was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges each financial year.

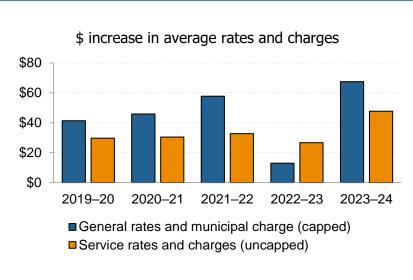

You can compare this council's data against its 'group' by looking at the fact sheet for regional city councils. Further information is available at http://www.esc.vic.gov.au/outcomes-reports. You'll find an interactive version of this fact sheet, a reader's guide to help you understand key terms and information about the sector as a whole.

Have council's average rates complied with the applicable rate caps?

2022-23 (1.75%) 2023-24 (3.50%) 2024-25 (2.75%) Yes Yes Yes

How have rates changed for different ratepayers?

Council's rating strategy 2024–25

Council levies 7 differential rates (for different types of properties) and uses service charges to recover the cost of waste services. More information about council's differential rate categories and charges can be found in council's adopted budget.

Distribution of rates increases and decreases

The applicable rate cap is applied to council's average rate, which means some individual rates increased by more and some increased by less than the applicable cap (or even decreased).

Wangaratta Rural City Council's total revenue remained stable in real terms between 2020–21 and 2023–24.

The decrease in grant revenue in 2023–24 partially reflects the financial assistance grants being received later than usual. Council would have received \$32.2 million in grant revenue if the payment was received before the end of the financial year.

Rates and charges, and grants were the largest sources of council's revenue, accounting for 75 per cent of total revenue between 2020–21 and 2023–24.

Revenue per person (2023–24 dollars)

In terms of revenue per person (which adjusts for population growth), council's revenue from 'other' revenue increased in real terms between 2020–21 and 2023–24, while grants fluctuated and revenue from rates and charges and user fees and statutory fees and fines decreased.

Working capital (current assets as a percentage of current liabilities)

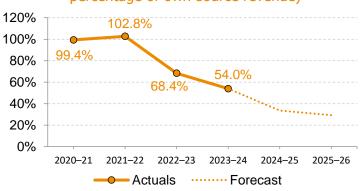

Between 2020–21 and 2023–24, Wangaratta Rural City Council reported an average **adjusted underlying result** of **-4 per cent**.

The average result would have been –1.8 per cent, if the timing of the financial assistance grants payment in 2023–24 was consistent with previous years.

An ongoing negative result, or deficit, suggests that, without the receipt of one-off grants or an increase in ongoing revenue, the council may not have sufficient revenue to fund the range and level of services it has been providing.

Council could meet its current financial obligations with a reported average working capital ratio of 177 per cent between 2020–21 and 2023–24.

Indebtedness (non-current liabilities as a percentage of own-source revenue)

Between 2020–21 and 2023–24, council reported an average indebtedness ratio of 81.1 per cent.

A council with a relatively high or rising indebtedness ratio may find increasing difficulty in repaying debt from revenue it controls.

Note: The year-on-year changes in the financial indicators can be affected by the timing of financial assistance grant payments. We have estimated the impact of a change in the timing of these payments for the 2023–24 adjusted underlying result. Please see the reader's guide for more information.
