RE: ReAmped Energy's application for a gas retail Licence

Dear Pablo,

ReAmped Energy have reviewed the six submissions received through the Engage Victoria website in response to our gas retail licence application. We would like to take this opportunity to respond to these submissions.

ReAmped Energy would like to thank each of the respondents for taking the time to review our application and providing their feedback. We would also like to acknowledge and extend our gratitude to those current ReAmped Energy customers who expressed their support of our electricity pricing and customer service. We look forward to the opportunity to provide simple low prices, no lock in contracts and our amazing live online service to Victorian gas customers.

ReAmped Energy are proudly independent and are not affiliated with any gas producing companies or facilities. Our Victorian gas proposition will source gas from the existing Declared Wholesale Gas Market and use existing gas infrastructure to transport the gas to our potential gas customers. ReAmped Energy will not own and/or operate any gas infrastructure and are not investing in the development of any new gas related infrastructure. Our proposition will not be bringing any "new gas sources" to market. Our role in the market will be to provide Victorian gas customers with simple low prices, no lock in contracts and great online customer service.

ReAmped Energy offers some of the most competitive prices for GreenPower in the market. By adding GreenPower to any ReAmped Energy electricity plan, ReAmped Energy customers are supporting the building of accredited renewable energy power generation in Australia. This is our way of supporting the development of renewable energy in Australia.

We would be pleased to address any further queries about ReAmped Energy's retail operations and/ or Gas Licence application. All enquiries can be made via our website by following this link: <https://www.reampedenergy.com.au/contact/>

Yours sincerely
