The major problem right throughout Australia is the lack of equality to the individual and what will separate him or her more, (which the COVID-19 has accelerated) is plainly, the loss of the disposable \$\$ from one's \$\$ income, to pay one's way unto death. But then, when the family bread winner disappeared, then the family partner had to work, due to most cases, family needs, education, the disposable \$\$ to live, contributes to G.S.T. by disposable \$\$ purchase, to likable item, or child comfort, did not happen, and now is getting very bad for resident & country.
