

Minimum feed-in tariff 2023-24

Submission received through Engage Victoria

Date submitted: 20/12/2022

Submission written by: Anonymous 8

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?

We cannot get and did not get a 30% reduction in our power bill, although our feed in tariff was reduced 30% by your actions last year.

What parts of our proposed methodology should we change?

Market forces should apply, setting a maximum and minimum is rubbish. The minimum should be set at the upper level 10 cp.

For our overall methodology, or parts of it, what alternative methodologies should we consider?

Rebating 30% of the costs we have incurred installing Solar, to justify your largesse to the power companies, who are shareholder driven. Perhaps give us 30% share of the power companies
