

# Minimum feed-in tariff 2023-24

## Submission received through Engage Victoria

Date submitted: 22/12/2022

Submission written by: Karen Johnson

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria ([www.engage.vic.gov.au](http://www.engage.vic.gov.au)). On this website, people were given the opportunity to send us a response to a set of questions we provided.

### **What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?**

#### **What parts of our proposed methodology should we change?**

I read that the feed in tariff will always be lower than the retail price. Part of the reasoning being that the companies have to run a retail business with the associated costs. True. It is also true though, that the companies charge everybody a daily charge on top of usage charges. Surely the daily charge is for covering those costs? They also charge us for sending a bill or for paying by credit card. Do you take that into account?

They charge peak rates during the day, surely we should receive similarly peak rates during the day?

### **For our overall methodology, or parts of it, what alternative methodologies should we consider?**
