

# Victorian Default Offer 2022

## **Submission received via Engage Victoria on next steps for the Victorian Default Offer**

**Date submitted: 11 June 2021**

**Submission prepared by: Anonymous**

### **What do you think about our approach for the next Victorian Default Offer price determination to apply from 1 January 2022?**

I really hope it reconsiders the significant reduction in minimum solar feed in rates that the ESC just put through..

Why.. Why would you want to kick the people who are trying to do the green thing? We should be increasing that FIT.. How disconnected is the ESC?

How is this an appropriate climate sensible thing to do? You should be incentivising people to take up solar..
