This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. This information is intended to help readers understand the impacts of rate capping, which was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges in each financial year.

You can compare this council's data against its 'group' by looking at the fact sheet for small shires. Further information is available at <http://www.esc.vic.gov.au/outcomes-reports>, including an interactive version of this fact sheet, a reader's guide to help you understand key terms used in this fact sheet, and information about the sector as a whole.

Is council operating sustainably?

Adjusted underlying result
 (adjusted underlying surplus or deficit as a percentage of adjusted underlying revenue)

Working capital (current assets as a percentage of current liabilities)

Indebtedness (non-current liabilities as a percentage of own-source revenue)

Between 2016–17 and 2019–20, Hindmarsh Shire Council reported an average **adjusted underlying result** of 4.3 per cent. An ongoing positive result suggests there is enough ongoing revenue to continue to fund the current level of service provision. The deficit in 2018–19 reflects higher non-recurrent expenditure related to flood recovery work. The surplus in 2019–20 reflects an increase in grants revenue.

Council could meet its current financial obligations with a reported average **working capital ratio** of 376 per cent between 2016–17 and 2019–20.

The reported average **indebtedness ratio** of 2.4 per cent between 2016–17 and 2019–20 places the council in the Victorian Auditor–General’s low risk category for this indicator, which means there is no concern over council’s ability to repay debt from the revenue it controls.

Note: Some of the year-on-year changes in these financial indicators may be due to the advance payment of Commonwealth grants (particularly in 2016–17) and changes to accounting standards or the impact of coronavirus (in 2019–20). See the reader's guide for more information.
