

Mitchell Shire Council

Group: large shire

This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. The information aims to help readers understand the impacts of rate capping. This was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges each financial year.

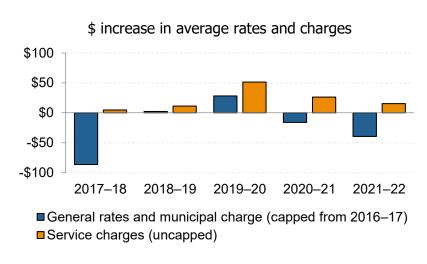

You can compare this council's data against its 'group' by looking at the fact sheet for large shires. Further information is available at http://www.esc.vic.gov.au/outcomes-reports. You'll find an interactive version of this fact sheet, a reader's guide to help you understand key terms and information about the sector as a whole.

How did rates change for different ratepayers?

Council's rating strategy 2022-23

Council applies 5 differential rates for different types of property, a municipal charge and recovers the cost of waste services using service charges. The adopted budget contains more information about rate categories and charges.

Distribution of rates increases and decreases

The applicable rate cap is applied to council's average rate. So, some individual rates increased by more and some increased by less than the applicable cap (or even decreased).

Did council operate sustainably?

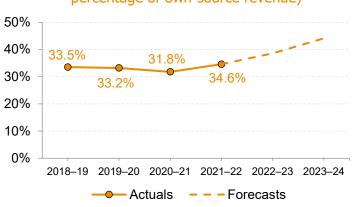

Between 2018–19 and 2021–22, Mitchell Shire Council reported an average adjusted underlying result of 0.9 per cent. However, the council reported a negative result in each year since 2019–20. An ongoing negative result suggests that, without an increase in ongoing revenue or receipt of one-off grants, ongoing revenue may not fund the range and level of services being provided.

Working capital (current assets as a percentage of current liabilities)

Council could meet its current financial obligations with a reported average working capital ratio of 260 per cent between 2018–19 and 2021–22.

Indebtedness (non-current liabilities as a percentage of own-source revenue)

Between 2018–19 and 2021–22, council reported an average indebtedness ratio of 33.3 per cent. The lower the percentage, the greater a council's ability is to repay debt from revenue it controls.

Note: Some of the year-on-year changes in these financial indicators may be due to changes to accounting standards or the impact of coronavirus. See the reader's guide for more information.
