

Moonee Valley City Council

Group: metropolitan

This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. The information aims to help readers understand the impacts of rate capping. This was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges each financial year.

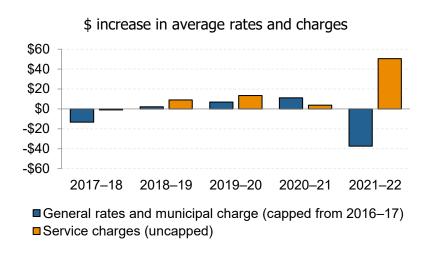

You can compare this council's data against its 'group' by looking at the fact sheet for metropolitan councils. Further information is available at http://www.esc.vic.gov.au/outcomes-reports. You'll find an interactive version of this fact sheet, a reader's guide to help you understand key terms and information about the sector as a whole.

Did council operate sustainably?

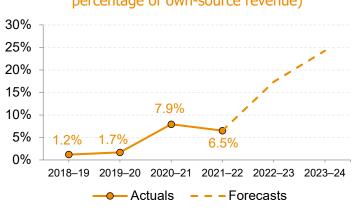

Between 2018–19 and 2021–22, Moonee Valley City Council reported an average adjusted underlying result of 5.2 per cent. An ongoing positive result suggests ongoing revenue can fund the current level of service provision.

Working capital (current assets as a percentage of current liabilities)

Council could meet its current financial obligations with a reported average working capital ratio of 158 per cent between 2018–19 and 2021–22.

Indebtedness (non-current liabilities as a percentage of own-source revenue)

Between 2018–19 and 2021–22, council reported an average indebtedness ratio of 4.3 per cent. The lower the percentage, the greater a council's ability is to repay debt from revenue it controls.

Note: Some of the year-on-year changes in these financial indicators may be due to changes to accounting standards or the impact of coronavirus. See the reader's guide for more information.
