

Stonnington City Council

Group: metropolitan

This fact sheet uses graphs and data to examine this council's revenue, expenditure and financial sustainability over recent years. The information is intended to help readers understand the impacts of rate capping, which was introduced in 2016–17 to restrict the amount councils can increase their general rates and municipal charges each financial year.

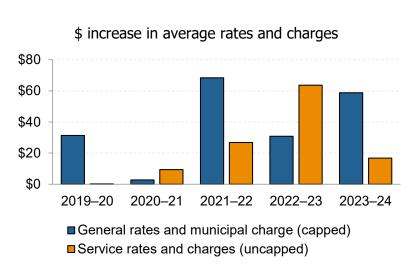

You can compare this council's data against its 'group' by looking at the fact sheet for metropolitan councils. Further information is available at http://www.esc.vic.gov.au/outcomes-reports. You'll find an interactive version of this fact sheet, a reader's guide to help you understand key terms and information about the sector as a whole.

How have rates changed for different ratepayers?

Council's rating strategy 2024–25

Council levies a single differential rate and uses service charges to recover the cost of waste services. More information about council's differential rate categories and charges can be found in council's adopted budget.

Distribution of rates increases and decreases

The applicable rate cap is applied to council's average rate, which means some individual rates increased by more and some increased by less than the applicable cap (or even decreased).

Total	209.1		218.7		228.8		222.7	

Stonnington City Council's total revenue increased in real terms between 2020–21 and 2023–24, reflecting increases in revenue from user fees and statutory fees and fines and 'other' revenue.

However, the decrease in grant revenue in 2023–24 partially reflects the financial assistance grants being received later than usual. Council would have received \$14.8 million in grant revenue if the payment was received before the end of the financial year.

Rates and charges, and user fees and statutory fees and fines were the largest sources of council's revenue, accounting for 84 per cent of total revenue between 2020–21 and 2023–24.

Revenue per person (2023-24 dollars)

In terms of revenue per person (which adjusts for population growth), council's revenue from rates and charges, user fees and statutory fees and fines, and 'other' revenue increased in real terms between 2020–21 and 2023–24.

Is council operating sustainably?

Working capital (current assets as a percentage of current liabilities)

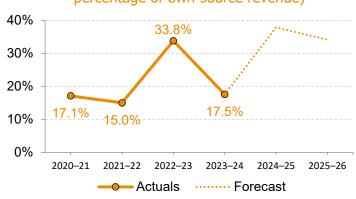

Between 2020–21 and 2023–24, Stonnington City Council reported an average **adjusted underlying result** of **-1.1 per cent**. The average result would have been *-0.8 per cent*, if the timing of the financial assistance grants payment in 2023–24 was consistent with previous years.

An ongoing negative result, or deficit, suggests that, without the receipt of one-off grants or an increase in ongoing revenue, the council may not have sufficient revenue to fund the range and level of services it has been providing.

Council could meet its current financial obligations with a reported average working capital ratio of 180 per cent between 2020–21 and 2023–24.

Indebtedness (non-current liabilities as a percentage of own-source revenue)

Between 2020–21 and 2023–24, council reported an average indebtedness ratio of 20.9 per cent.

The lower the percentage, the greater a council's ability to repay debt from revenue it controls.

Note: The year-on-year changes in the financial indicators can be affected by the timing of financial assistance grant payments. We have estimated the impact of a change in the timing of these payments for the 2023–24 adjusted underlying result. Please see the reader's guide for more information.
