Is council operating sustainably?

Between 2020–21 and 2023–24, Wellington Shire Council reported an average **adjusted underlying result** of **-0.4 per cent**. The average result would have been **3.2 per cent**, if the timing of the financial assistance grants payment in 2023–24 was consistent with previous years.

An ongoing positive result suggests there is enough ongoing revenue to continue to fund the current level of service provision.

Council could meet its current financial obligations with a reported average **working capital ratio** of **385 per cent** between 2020–21 and 2023–24.

Between 2020–21 and 2023–24, council reported an average **indebtedness ratio** of **20.9 per cent**. The lower the percentage, the greater a council's ability to repay debt from revenue it controls.

Note: The year-on-year changes in the financial indicators can be affected by the timing of financial assistance grant payments. We have estimated the impact of a change in the timing of these payments for the 2023–24 adjusted underlying result. Please see the reader's guide for more information.
