SOUTH EAST WATER BILLING

The billing rate system used for calculating charges is flawed, unfair and promotes wastage of a scarce resource.

1. Water usage charges \$ 68.21
2. Service charges \$126.39

B/A% = 185%

Our household actual water usage 16,000 litres for 2 people beats the SE Water target by 44%.

Consequently our bill in the manner that SE Water chooses to calculate in fact subsidises the wallies.
