Solar Power

9/2/16

Dear Sir/Madam,

I love solar power and the Earth loves solar power, we hate coal fired power stations and their expensive prices. clean renewable energy is amazing and yet we get next to nothing for putting our clean harvested energy into the Grid where it is sold on at a multiplied price. It is unfair, unjust and downright **WRONG** for the solar producers and **WRONG** for mother Earth. Australia is bounteous with solar energy yet the people who are doing the right thing are punished with punitive prices while the fat cats get rich off our backs.

Do the right thing and support Solar Energy
