## **Solar**

10/2/16

To Whom it may Concern.

I have 16 Solar panels on my roof.. Buyback is a very sore point. I make power for you to sell it back at a great profit ?

Rooftop solar is more valuable and delivers more benefits than dirty fossil fuels.

All I Want is a fair price. Not for the retailers to buy Solar Power cheap , then sell it at an inflated price.

Charge for solar power should be minimised as rooftop solar puts less strain on the grid. solar power helps reduce costs,averting the cost, for more poles and wires.

Rooftop solar power creates no carbon pollution, no particulate pollution and does not create other environmental and other health problems. Not like the pollution associated with the mining, transportation or burning of fossil fuel.
