**Re rooftop solar power**

9/2/16

To Whom it may Concern

As a home owner with rooftop solar panels, I would just like to submit my concerns that we only receive 5c kW it is clean healthy energy and we are helping the environment . It is unfair that we should not get the full benefits when we are trying to do the right thing.

I hope the state Labour Government keeps their word in looking into this unfair situation

Thank you for taking my concerns seriously
