## **Solar rip off**

9/2/16

Dear sir/madam.

I would like to express my distaste at how my family has spent a small fortune installing solar panels and the energy we produce is being stolen off us and sold to the community as over inflated 'clean energy'.

Energy providers offer a small amount per KW for clean energy produced from families like my own and then on sell this power, with little to no outlay on grids or infrastructure, at a huge mark up! This is piracy and since we have no recourse but to accept their conditions, tantamount to blackmail.

The world needs to change to save our planet. Green energy is the future.

It only takes one person to change the antiquated ideology of power companies and break this stranglehold they have on society to make a real change in all our children's futures.

Support solar energy. Support Australia's next step towards a better world for our children.
