

Robert Stephen

**Dear Commission**

9/2/16

It is utterly wrong for people like me who spent \$7,000+ on 16 solar panels and inverter, employing at least 6 people in the process, over a seven day period, due to complications, and your government rewards me with nothing. That's what 5% is NOTHING yet you give millions to the coal industry who destroys our kids future.

Arnt you guilty for stuffing up your kids future.

Do you ever think that deep or is it the funding your party gets from the mining companies every election. Do something good for once and reward people who think and act for the future. Remember no environment no economy no future for your kids!
