

Joe Fernande

A rip off by my energy company Energy Australia

9/2/16

Dear Sir,

It is grossly unfair that that the solar energy from my roof is bough by my energy company for a mere fraction of the cost that it is worth when weighed against the benefit in not using dirty polluting fossil fuels. Further the energy that I export to the grid is sold by my energy company to my "neighbour" for a huge profit.

This distorted unfair trade practice (or is it extortion?) needs to be investigated by the Commission thoroughly and a decision made that is fair and just to powerless people like us – solar energy generators.
