

We strongly object to any further delays to the construction of the planned sewerage scheme for Loch, Nyora and Poowong.

For many years we have made numerous complaints to council of untreated sewerage in the open drains bordering our property. With many other areas of the Nyora township also affected, this situation is creating a serious health risk to our family, community and environment.

We urge you not to delay the implementation of the very essential and critical sewerage infrastructure.

John & Diane Hallas.
