Our health and environment

9/2/16

Dear ESC Officer

It is of concern to me that we have a clean non polluting energy source which does not cause ill health and potential civil unrest in our current and future populations.

Rooftop solar power creates no carbon pollution, no particulate pollution and does not create other environmental and other health problems such as those associated with the mining, transportation or burning of fossil fuels.

I would appreciate if solar and other clean energy is supported by government and that coal powered fuel is decreased in support with a polluter fully pays economic price associated with the health, social and economic costs that it is responsible for.

Regards

Rubén Burns
