### **Solar rebates**

9/2/16

The Government is going to need answers to questions sooner rather than later because they have kowtowed to the power utilities for too long and people are not happy. The incumbent power utilities have abused their privilege and stolen from the populous for too long.

Watch upcoming elections to see just how annoyed that populous is, because I will be casting my vote based on this issue and it does not look good for the incumbents

Power for the people!
